OUR VISION

Our long term vision for Altswitch is to be a key figure and play a major role as a decentralized autonomous organization (DAO) that hosts a tech solutions ecosystem which is influenced by a circular economic model that utilizes transaction taxes to drive growth and reward its holders.

Our visionary and innovative team is focused on introducing to its investors the most convenient way to earn any coin of their choice. Not only does AltSwitch have the potential to double an investment but also possibly surge its value according to their risk appetite alongside its market performance.

We have conceptualized, designed and built AltSwitch with a vision to establish a universal rewards token that provides its holders the power to choose from a vast selection of coins available on the Binance Smart Chain which matches their investment risk tolerance for their chosen cryptocurrency. This would be the inception stage towards ultimately becoming a DAO platform that hosts an ecosystem of businesses that can transact and provide services on the blockchain as well as becoming a key figure in the Metaverse and Web 3.0. We are also going to look into having crosschain/multichain operability to provide the most people access into the vast opportunities that AltSwitch will provide.

MISSION

AltSwitch's mission is to empower, enrich and continually expand our community of investors to help them thrive within the crypto market. The crypto space is constantly expanding and innovating and in the long term, we aim to become a key player in driving solutions based technology on the blockchain and also be a pioneering platform that serves as a secure alternative to the conventional financial system and its current mechanisms. Ultimately, our goal is to become a decentralized ecosystem with a reach that expands into the Metaverse and Web 3.0.

Universal Rewards Protocol, DAO powered Ecosystem

The mother of all soon to be built Apps & Services for Web 3.0 that will generate revenue of rewards back to its community.

AltSwitch is a first-of-its-kind Binance Smart Chain rewards token that gives you absolute control over which rewarded coin you receive.

Simply by holding Altswitch (ALTS) in your wallet, you gain access to rewards from any of the listed coins on the Binance Smartchain and tons of token utilities soon. Take part of the privilege to the unlimited potential of this pioneering smart chain project and be part of a solid community.

ABSTRACT

01010100 01001000 01000101 01000000 01001110 01000101 01010111 01000000 01010011 01011001 01010011 01010100 01000101 01001101

“First-of-its-kind” Universal Rewards Protocol - DEPLOYED

Altswitch was conceptualized and has been under long term development. It was formally established in 2021 to generate passive revenue for the community. Simply by holding AltSwitch token in your wallet will enable you to earn any coin of your choice on the Binance Smart Chain. Altswitch is an open-source and completely decentralized platform that has been conceptualized, driven, and developed by the community. With a total quantity of 1 billion tokens with half of them set to be burnt after launch, the current circulating supply is approximately 500 million tokens. The more AltSwitch you own, the more you get rewarded with the coin of your choice; sourced from the overall volume of transaction taxes.

AltSwitch Dashboard - DEPLOYED

In the medium to long term, AltSwitch's team of developers are aiming to establish a state-of-the-art earnings management dashboard where investors can keep track of the total amount of rewards they have been paid, their claimed/unclaimed rewards and when the next reward release cycle will take place. It will also enable the community to access a complete record of their rewards transaction history and eventually will be further developed in ways that can help users maximize their rewards earnings and utility.

AltSwitch as a DAO

Another future development that we aim to accomplish in the long term is for AltSwitch to become a DAO or Decentralized Autonomous Organization. Put in simple terms, AltSwitch developments will be democratized and votes will be weighed by virtue of the amount of tokens each individual holds. The more tokens you hold, the more influence you hold in the community vote from which developments will be decided upon. Once established as a DAO, AltSwitch will serve as a platform for other developers to build on top of the existing technology with their own smart contract on a plug n play basis utilizing the DAO's wide array of available functionality.

AltApps & Services

Another long term milestone of the project is to provide multiple apps and services to maximize and expand the use case of the token. These can range from Digital E-commerce Services Platform, Contract Integrity Composition Platform, Anti-Fraud Database Watchlist Platform, etc which will have AltSwitch as its ecosystem's governing token.

Alternate Universe (Metaverse)

One of the team's ultimate goals is to be a significant player and place holder in the Metaverse. We envision AltSwitch as a project that will eventually disrupt the current centralized constraints that bind people to paying taxes to their respective Governments which makes decisions on behalf of its constituents over how these taxes are to be spent, redistributed, etc. We will build an Alternate Universe wherein each member of the ecosystem is empowered by the very tax they pay for the services they avail, the transactions they make and the tools they use. They are directly rewarded back a portion of the value of what was taxed from them. Creating a circulating and entirely system self-sustaining economic model that will uphold the continuous innovation and upkeep of the Alternate Universe.

ALTswitch

CORE VALUES

LONGEVITY

AltSwitch as a project and as a cryptocurrency is a thesis on community empowerment through a circular economic model that rewards its investors not only for holding the token but also for incorporating and adopting it in peer-to-peer, consumer-to-business, and business-to-business transactions. We aim to be a foundational pioneer in proving not only the token's use case but also its potential to establish an alternate universe in the Metaverse space.

AUTHENTICITY

Our team believes in authenticity, with our goals, the way we operate and the way we interact with the community. You can trust that our intentions will always be to better the community and to innovate in the spirit of convenience and sustainability.

TRANSPARENCY

Transparency is integral and should be at the core of any cryptocurrency and we will strive to provide the most access to the community of our milestones, progress and achievements as we innovate and improve for its benefit.

ALTSWITCH

SECURITY

We value security as one of, if not the top concern for any individual or party that participates in crypto. Our Anti Whale Dump technology protects investors from malicious market manipulation practices that may trigger erratic volatility in the market. We are also set to be audited by reputable auditing entities in the space such as Certik for our smart contract.

HUMANITY

With all the technology that surrounds the project and its day-to-day operations our team constantly keeps in mind that we do it for the advancement and empowerment of humanity; transcending past borders, race or nationality. We would like to dedicate our work to improving the overall human experience. We care for our kind; we are after all, at the root, one race; the HUMAN race.

WIDE RANGING

Constant expansion as an indicator of growth is a guiding principle of the project. The team aims to be a key platform for solutions providers and eventually a key figure in the establishment of Web 3.0 and the Metaverse.

CUSTOMER CENTERED

The long term direction of the project is to be a platform for solutions based providers on the blockchain with AltSwitch as the governing token that drives its digital economy. In line with this is our customer centric values of which we aim to provide a world class user experience with the most security and ease of accessibility for its users.

INTEGRITY

The team makes and will continue to make its innovative and integral decisions with its guiding principles and values at the center. The community and its investors can be rest assured that we will continually operate in this manner as the project continues to grow and reach its goals.

TECHNOLOGY

Technology is the central mechanism that drives AltSwitch as a cryptocurrency and as such we will constantly be on the lookout to adopt any beneficial improvements in the space to provide the most ease of access and use.

BLOCKCHAIN

01010100 01001000 01000101 00100000 01001110 01000101 01010111 00100000 01010011 01011001 01010011 01010100 01000101 01001101

Binance Smart Chain (BSC) was developed as a means of utilizing solidity-based smart contracts with much greater speed and efficiency than other, competing chains. With decentralized exchanges on BSC offering lightning-fast swaps and extremely low fees, BSC has started to become one of the most widely used blockchains for Decentralized Finance (DeFi). BSC uses a token protocol developed by the Binance Team called BEP-20. This is the blockchain that will host Altswitch's Universal Rewards Protocol.

Advantages of the Binance smart chain are:

- It's a proprietary blockchain, which will provide security and safety to all users and developers.
- Its native dual chain interoperability will allow cross-chain communication and scaling of high-performance dApps that require a fast and smooth user experience.
- It's EVM-compatible and will support all of the existing Ethereum toolings along with faster and cheaper transactions.
- Its on-chain governance with Proof of Staked Authority consensus, built on 21 validators who validate the transactions, will provide decentralization and enable significant community involvement.

Multi-chain capabilities will also be part of AltSwitch's expansion

ECOSYSTEM

AltUniversal Rewards

Holders of the ALTS token are entitled to be rewarded in the form of their chosen cryptocurrency of their choice, the amount of the rewards are determined by 8% of the community's transactions in its US dollar value. Holders can opt to change their chosen rewards to any cryptocurrency on the Binance Smart Chain at any period. The best utilization of this protocol is through token accumulation and long term holding with ALTS being a placeholder to generate lifelong passive income from the ecosystem's transaction volume and to capitalize on the future utility of the token as the technology is expanded and innovations are incorporated.

ECOSYSTEM

AltLucky Buyer

Lucky Buyer is a Decentralized Jackpot Lottery function which provides entries to a select few buyers for the week to a weekly jackpot pool. A winner is selected at random, facilitated by a coded open source protocol from a soon-to-be ported AltSwitch smart contract. The use case of this function incentivizes accumulation from new buyers that fall under a given lottery period that renders them eligible to participate for that period.

The rewards pool is then redistributed to 3 eligible winners with the 1st draw winner earning 70% of the pool, 2nd draw winner earning 20% of the pool, and the 3rd draw winner earning 10% of the pool. The rewards (autonomously facilitated by the smart contract) are then directly deposited to the winners' wallets.

This is sourced from a specific portion of AltSwitch's operations wallet.

ECOSYSTEM

DAO Platform

A long term milestone of the project is to eventually incorporate the protocol into a Decentralized Autonomous Organization that democratizes development efforts and grants a weighted value on each vote in accordance with the total number of tokens held by an individual. Once established as a DAO, AltSwitch will serve as a platform for other developers to build on top of the existing technology with their own smart contract on a plug n play basis utilizing the DAO's wide array of available functionality.

As a DAO platform, we will enable customers to maintain control over their smart contract functions without having issues of centralized privileges which is a huge concern to audit firms and careful investors.

In order to prevent centralized privileges, the contract owner can transfer the ownership to AltDao's decentralized generated contract, they will then have to set the quorum of designated token holders to trigger such functions as either valid or invalid. This will ensure that the smart contract (backed by our DAO solutions) is protected along with its holders from centralized desires and will not compromise future developments of the owners' smart contract.

ECOSYSTEM

AltApps & Services

Another long term milestone of the project is to provide multiple apps and services to maximize and expand the use case of the token. These can range from Digital E-commerce Services Platform, Contract Integrity Composition Platform, Anti-Fraud Database Watchlist Platform, etc which will have AltSwitch as its ecosystem's governing token.

Think of our status quo, you have a currency, you buy something, once you spend your money there is a value added tax. And that tax goes to a centralized institution.

The number one objective of this on the ecosystem is to drive more token utility and more reason to buy and spend ALTS on our built AltApps & Services within our ecosystem, the tax for every transactions within the ecosystem instead of going to a centralized single institution, with AltSwitch it goes back to all of its token holders which will fuel the passive income of our community. These apps will significantly contribute to the amount of cryptocurrency rewards to be redistributed.

ECOSYSTEM

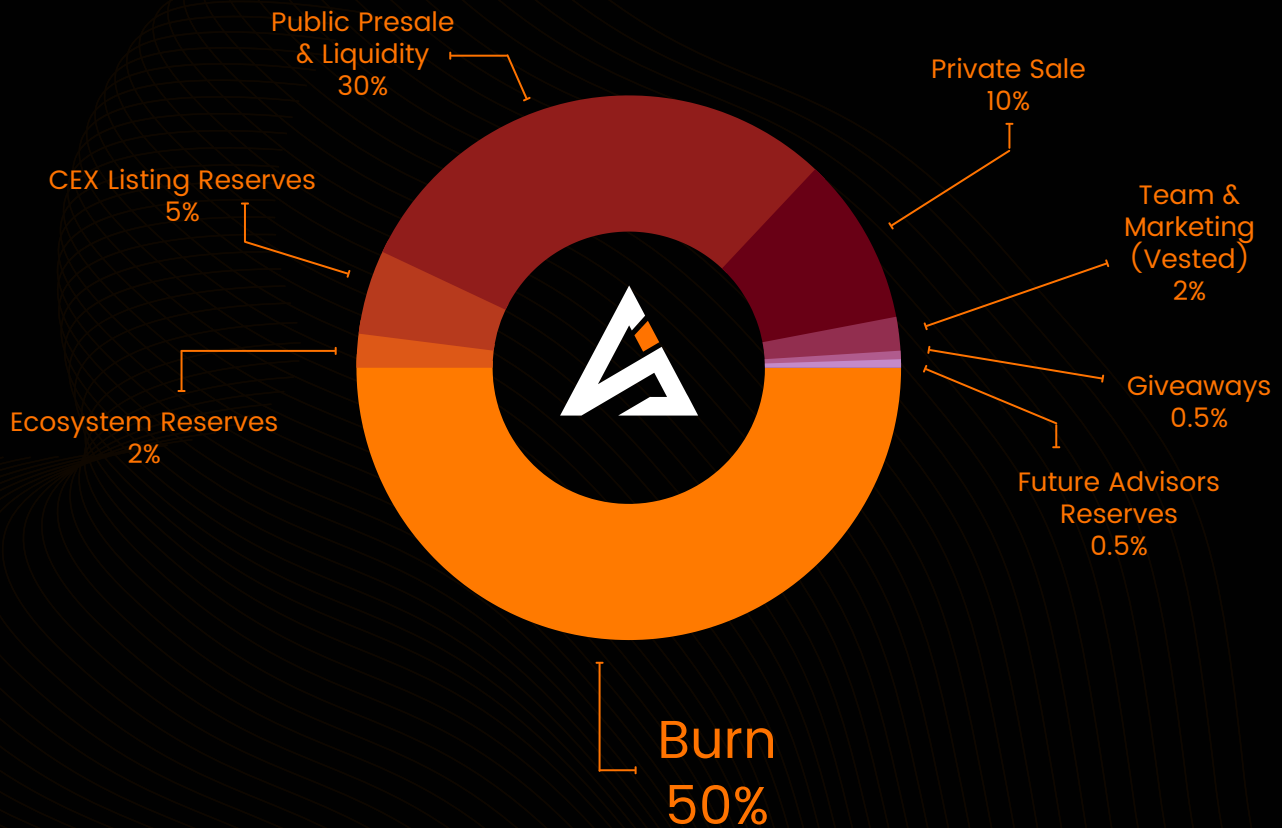

Alternate Universe (Metaverse)

The ultimate goal of the project is to eventually become a key player and a significant entity in the Metaverse. Unlike the current centralized economic mechanisms of taxation that is not transparent and leaves taxpayers with little control, we aim to create a digital alternate universe wherein the community is empowered by redistributed taxes in the form of rewards from transactions on the platforms that will be built on top of and governed by AltSwitch as its central token.

Everything that is being built along the way is part of the big picture in finally building an Alternate Universe (Metaverse) which has its own decentralized tax system.

PRESALE

0101000 01001000 01000101 01000000 01001110 01000101 01010111 01000000 01010011 01011001 01010011 0101000 01000101 01001101

The Presale will have 2 sets, namely Private Presale and Public Presale. The purpose of this approach is to make sure both Presale will have strong foundation in terms of community and funding.

Private Presale

The purpose of this presale is to connect with Community leaders, personally discuss to them about AltSwitch, and if they feel AltSwitch is a good investment option we have an attractive offer to them which is tax free, 50% more compare to public presale and 70% more compare to listing rate per BNB. The formulation of the rate is to make it attractive and at the same the right balance of them not being able to dump our project unlike others who provide 100-500% rate difference to presales which is very dangerous on token launch. We are going to be doxxed to our Private Investors because as an initial investor we want to provide confidence and at the same time we would like to be careful to whom we are going to trust a bigger amount of token rates. Private presale will be the source of funding to support and make sure our huge Public Presale will be successful.

Figures:

100 Million Tokens for Private Presale (10% of Total Supply)
 Target of 333 BNB Private Presale
 Buy limit 1 - 5 BNB
 300,000 tokens/BNB (50% more compare to public presale)

The tokens will be vested upon launch only, to avoid unwanted adding of liquidity by other token holders which might result to unplanned launching.

Eligible Private Investors: Leaders of community

PRESALE

0101000 01001000 01000101 01000000 0100110 01000101 01010111 01000000 0100011 01011001 01010011 0100100 01000101 01001101

PinkSale.Finance

Public Presale

The Public presale will be conducted on Pinksale.finance since we see the latter as the perfect partner to provide best experience to all parties involved. Pinksale offers KYC, Audit, Liquidity Locking, Token Locking, Secured Auto-Liquidity Generation, Easy Refund if Presale failed and Anti-bot features which will be useful for our Launch. To be able to participate in our Public Presale, you must earn your slot by participating in our Whitelisting Events. We want to provide this opportunity to our Investors to prove their worthiness.

Figures:

300 Million Tokens for Public Presale (30% of Total Supply)
 Target of 1,000 BNB Public Presale (Source of 70% Liquidity)
 - Softcap: 500 BNB
 - Hardcap: 1,000 BNB
 Buy limit: 0.1 - 5 BNB
 200,000 tokens/BNB (30% more compare to pancakeswap listing rate)

If the presale pool did not fill for 30 minutes from whitelisted addresses on launch of presale, it will be open for Public.

Eligible Public Sale Investors: Whitelist winners

WHITELISTING:

Gleam.io Whitelisting
 Persons to pick: 300 Pax (First come first served) (excess for potential buying gap)

Discord & Giveaway Whitelisting
 Persons to pick: 300 Pax (First come first served) (excess for potential buying gap)

PRESALE

The dates of token unlocks are estimation of our planned utilization to serve its purpose. Just in case unlocking is earlier that utilization, we will relock the tokens for security.

DEVELOPMENT

0101000 01001000 01000101 00100000 01001110 01000101 01010111 00100000 01010011 01011001 01010011 01000101 01001101

The Innovation of AltSwitch NON RENOUNCEMENT

AltSwitch is a decentralized protocol owned by its whole holders and running under the decentralized technology of Blockchain - Binance Smart Chain (Bep20).

The ownership over the masterpiece smart contract of AltSwitch won't be renounced to keep the developments going. Because renouncing of ownership is irreversible.

Renouncing the ownership or transferring it to a dead wallet address will kill the ability of the project to recover or adapt to the ever changing world. And as part of our community values, we want to be relevant to the changes of the future and be able to continually develop our project.

Potential Centralization Risk Occurance

The risk of keeping the ownership is only limited to what set of "write functions" allowed on the smart contract code. And AltSwitch's write functions are only almost limited to adjusting the tax fees so we can lower them once we have already built a larger market reach, but there is no such function that will completely stop the trading, or freeze the assets therefore there is no huge risk.

Also as an Institution that recognizes the advantage of being a DAO, part of our Journey is to transform the ownership of AltSwitch to our DAO Platform and provide the same solution to other smart contracts as well. This will completely eliminate the risk of having a centralized privilege by the owner only. Therefore, this will involve the community more to protect and stir the faith of the project without having to lose the ability of the project to adapt to changes.

ALTSWITCH PROTOCOL

01010100 01010100 01000101 01010000 01001110 01000101 01010111 01010000 01010011 01011001 01010011 01010100 01000101 01001101

AltSwitch protocol's pioneering design aims to reward its holders with any cryptocurrency of their choice available on the Binance Smart Chain. Opening the doors to vast opportunities in investment strategies and utilities that can be turned into a passive income source.

Automated Universal Rewards Protocol

This is the foundational function of the AltSwitch token which rewards any holding wallet with any cryptocurrency of the holder's choice on the Binance Smart Chain (Bep20). The rewards are from a pool that is driven by the 8% buy and 10% sell transaction taxes from the trading volume of the token and will have additional compounding percentage taken from a seller's transaction within 24hours from its last sell transaction.

Dividends Tracking

AltSwitch has a supplemental smart contract that is in charge of tracking all dividends of each holders, this will enable us to provide them accurate information about their rewards, such as total rewards paid, pending rewards, recent rewards transactions, Queue Position, Your ALTS asset holdings, Calculation of rewards based on transaction volumes & ALTS asset holdings.

Automated Liquidity Acquisition

Liquidity is the lifeblood of any cryptocurrency and as such making sure it is stable and sustained is vital to the longevity of any project. In light of this, our smart contract automatically puts in place a 2% liquidity fee from each transaction and will have additional compounding percentage taken from a seller's transaction within 24hours from its last sell transaction which secures the project's price floor health and keeps AltSwitch stable while sustaining large market activity.

Anti Bot Sniper Function

This function deflects "sniper" bots that buy in immediately after liquidity is added in the blockchain, this negatively impacts the price action of the token upon launch. This makes sure that AltSwitch provides a leveled and equal opportunity to the community upon its launch on the blockchain.

ALTSWITCH

ALTSWITCH PROTOCOL

01010100 01010100 01000101 01010100 01001110 01000101 01010111 01010100 01010111 01011001 01010100 01000101 01001101

Operations Wallet

This is where the whole operations of AltSwitch for Development, Designs, and Marketing will be funded.

Having this kind of wallet will prevent the core team from contributing to selling of tokens just to fund its operations which is vital for the long term sustainability and continuous expansion of AltSwitch.

A portion of 4% buy and then 6% sell transaction taxes & will have additional compounding percentage taken from a seller's transaction within 24hours from its last sell transaction is allocated for this that is already converted into BNB Bep20.

Dynamic Dump Protection Technology

A masterpiece that levels the field by placing interrelated systems that prevent massive sell off volumes to protect its community.

One layer of this system dynamically sets a maximum sell volume in relation to a percent of the current liquidity on a single transaction.

Another layer is a compounding sell tax of 2% per successive sell transactions on top of the base 18% sell tax that funds the rewards pool which then gets redistributed to holders. These are set in place to discourage erratic market volatility on the price action of the token and prevent "pump-and-dump" schemes as well as incentivize long term investment and holding practices. These mechanisms reset after a 24hr period from the last sell transaction captured.

Tax Formula

The formulated total tax to achieve a right balance between lucrative passive income, fulfillment of developments and aggressive marketing is 14% and are breakdown with the following figures:

8% for Holder's Rewards

2% Liquidity Fee grows the Project price floor health

4% Operations Wallet (Marketing, Promotion, & Strategic Buyback then burn fund wallet)

SELL LIMIT

Maximum 1% of the current liquidity allowed on a single transaction,

SUCCEEDING SELLS

Compounding 2% tax on top of the 18% base tax, resets back to base tax after 24hrs of not selling.

01010100 01001000 01000101 00100000 01001110 01000101 01010111 00100000 01010011 01011001 01010011 01010100 01000101 01001101

The AltSwitch team is composed of unique individuals who are experts in their respective fields. They have proven, successful track records. Each one was handpicked and gathered by the CEO and was shared with the future of AltSwitch and its opportunity to solve the status quo of centralization. The fact that they are part of the team means they have seen the vision of what AltSwitch will be in the future and how significant it will be on the web 3.0.

The core team members are designated leaders of their field and are divided into 3 major departments. They are instrumental to ensuring the success of AltSwitch. The 3 Major departments are as follows:

Development Department

This department is composed of 3 leaders who are developers in Java, Python, Solidity, Web and more who are responsible for the success of technical utilities of AltSwitch.

Design Department

This department is composed of design leaders who have relevant skills in graphic design, video editing, and copywriter. They are responsible for delivering creative visual materials that comprise Altswitch's distinguishable branding aesthetic.

Marketing Department

This department is composed of marketing leaders that are experienced crypto marketers, a social media manager, a public relations officer, and a partnership officer.

The team is designed to work interdependent with each other. Each core member is given an authority to lead and responsibility to research & develop for their assigned department to induce growth.

BITmax
Chief Executive Officer

Any professional path is first paved with a few small steps on the rocky road, propelled and guided by a highway of knowledge and experience. Bitmax's journey began with a Bachelor of Science in Legal Management degree, where he gained the necessary skills and knowledge in proper legislative proceedings, Public and Business Management as well as the mechanisms and procedures of the Justice System in correlation. Gaining and building his proficiency in this field helped him to become a Corporate Secretary of a Construction Corporation which he then carried over in his pursuit to succeed as a Millennial Businessman and gain notable achievements in the business sector.

Bitmax came across cryptocurrency and emerging web 3.0 and decided that it was the right vehicle to put his business ideas to life. He then built a team around the vision of realizing AltSwitch's technological innovations and utility and offering it to the decentralized market of crypto.

BNBae Chief Technology Officer

BNBae is a master's degree graduate specializing in High-performance computation and Big Data analysis. He has over 7 years of experience in developing a wide range of enterprise and web applications, with a focus on decentralized solutions. He is constantly seeking scalable and efficient approaches and applies these principles to the research and development that goes into AltSwitch's ecosystem.

ETHero Chief Design Officer

ETHero graduated as a Computer Programming major, he is also a Visual Design National Certificate Holder with 4 years of experience in art and design. He has won various Art and design competitions and is the design lead who is responsible for AltSwitch's website development.

TEAM

01010100 01010100 01000101 01010000 01001110 01000101 01010111 01010000 01010011 01011001 01010011 01010100 01000101 01001101

DOGEFather **Chief Marketing Officer**

Head of Marketing Strategy – When it comes to tech-entrepreneurship and Marketing, DogeFather finished a master's degree specializing in online marketing. He is a genuine visionary 2.0 and a true flag-bearer for the industry. His wide experience in marketing spans over more than 10 years. He is a pioneer in seeing the potential of blockchain technology and cryptocurrencies. He has been able to grow projects in this vast and fast paced market. When “AltSwitch” was brought to his attention, he immediately saw the prodigious potential behind the project and became not only its first investor and a core team member, but also in charge of marketing development and strategic planning.

XRPixel **Chief Social Media Officer**

XRPixel has found relative career success in owning a Social Media Agency with international businesses under its clientele. Her agency is responsible for establishing their social media presence with a distinguishable brand identity. She oversees AltSwitch's social media channels, its moderators and community engagement.

TETHERogue **Chief Communications Officer**

TetherRogue holds a Bachelor's Degree in Psychology. His professional experience ranges from telecommunications, global background screening for fortune 500 companies, and consultancy.

He is currently a consultant for a healthcare company providing auditing services as well as serving as the assistant for its Chief Operations Officer. His affinity for writing has won him awards in poetry competitions, speakership deals with international schools and now as a part of AltSwitch's core team responsible for Copywriting any and all written word releases.

01010100 01001000 01000101 00100000 01001110 01000101 01010111 00100000 01010011 01011001 01010011 01010100 01000101 01001101

SOLDier **Chief Scouting Officer**

Seeing the good in the bad is what makes Soldier prominent. He's a young, full-time trader who has invested his time and effort to learn more about different markets like forex, stocks, and especially crypto. He has witnessed the ups and downs of the market which caused him to see the different opportunities in the market. His connections to people have grown as he was handling different kinds of communities in crypto space. He experienced handling different projects, and when he was given the opportunity to become a part of the "AltSwitch" team, he didn't fret as he viewed this project to be a game-changer in the market.

CARDANOva **Chief Human Resource Officer**

CARDANOva has extensive experience in public service and public speaking spanning a total of 11 years. She also holds a Bachelor's degree in Tourism Management. Currently she is the team leader of a consultation company. Her exposure to public engagement and interacting with a plethora of different personalities has led to her being assigned as Altswitch's Chief Human Resource Officer, responsible for screening future talents to be onboarded for its team expansion.

STELLARcat **Chief Public Relations Officer**

Stellarcat has built up his knowledge of blockchain technology and cryptocurrencies ever since 2017. He has been exposed to multiple projects, communities and key personalities in the crypto space. He has also worked alongside pioneers in the space who have developed and grown projects to notable market capitalization. He serves as AltSwitch's Chief Public Relations officer for his ability to network and build relationships among key players in the cryptomarket.

TEAM

DOX & KYC

The team keymen are doxxed with their private investors and project partners. They are also KYCed in the spirit of providing confidence to the whole community against malicious practice such as rug-pulling which will result in certain team members and their identities to be revealed just in case it went to a malicious situation. It was with due consideration and reflection that the team decided not to be doxxed directly to the public community to protect our privacy and security. They view being KYCed privately as the perfect balance between their security and AltSwitch community's confidence.

Drawing the leading figures of the emerging tech world to the Middle Eastern metropolises for cutting edge technology, the 2022 AIBC UAE expo plans to unite the policy-makers, developers, C-suite executives and legal experts of the burgeoning AI and Blockchain sectors.

Through three days of educational panels, inspiring keynote speeches, workshops and networking events, the expo seeks to create the foundation that the Industrial Revolution 4.0 can be built upon.
